Pump Engine Speed & Flow Logging Package

Engine governor control, live flow readout and PC data logging for dewatering pump sets.

OVERVIEW

Built for dewatering pump sets. A 27HMI v2 display controls the engine governor through a 0-5 V output module and shows governor volts and pump flow in liters per minute. Data logging to a PC runs through a CAN-to-PC module and ICDT data-logging software, with a data-logging indicator on the display.

- Governor control, 0-5 V output
- Live flow (L/min) readout
- CAN-to-PC data logging
- Logging on/off and error indication

SPECIFICATIONS

Display	27HMI v2: line 1 heading, line 2 data; power, logging and error LEDs
Engine control	Governor volts +/-, 0-5 V output module
Measurement	Pump flow in L/min (customer-supplied flow meter)
Data logging	CAN-to-PC module + PC data-logging software

TYPICAL APPLICATIONS

Dewatering pumps · Bypass pumping · Irrigation pump sets
